➤ TITLE

Artificial intelligence in nutrients and science

AUTHOR

- Jaroslaw Sak,Magdalena Suchodalska

PUBLICATION

- Multidisciplinary Digital Publishing Institute

YEAR

- 22 Jan 2021

METHODOLOGY

- Deep learning algorithms are prevalent in a group of research works on clinical nutrients in taken.
- The development of dietary system using AI technology may lead to the creation of the global network that will be able to both actively support and monitor the best personalized supply nutrients.

ADVANTAGES

- AI drives down the time to perform task

- AI arguments the capabilities of differently abled individuals

DISADVANTAGES

- High cost and no creativity
- Make human lazy and no improvement

➤ **TITLE**

Analysis of mobile applications reporting on nutritional recipes

AUTHOR

- Jose Huamani-Cahwana, Michael Cabonillas-Carbonell

PUBLICATION

- EDP Science publication

YEAR

- 2010

METHODOLOGY

- The type of study used in the systemic review of the scientific literature with the prism methodology, according to a systematic review is a concise summary of the information provided by other researchers regarding a topic of social interest
